FOREWORD

When I announced to my team in mid-December that the plan to engage civil society from north to south, Bekaa to Beirut, and be done by the end of January, my plan seemed too ambitious. Given the time constraints and typical unresponsiveness we are accustomed to receiving when booking meetings with public officials to discuss socio-economic matters for our reports, it seemed an impossible feat.

Thankfully for us, civil society does not rest, and many dedicated members of our community helped turn this overly ambitious plan into reality. Come rain or shine, over weekends and on public holidays, they are busy rolling up their sleeves, working within their communities to try and make a difference. Their level of involvement exposes them to the real truth of their communities’ hunger, misery, and poverty. Day in and day out they are observing, challenging, and finding practical solutions to alleviate the impact of these socioeconomic realities. In this collaboration, they organized and motivated themselves, reading our first draft with careful attention to detail, before sharing suggestions inspired by their first-hand experiences. These are men and women who are neither hungry for power nor motivated by fame and riches—their only fuel is human empathy and respect for the other, regardless of race, gender, age, or religion. With so little, they are able to save lives. They are the silent soldiers of social justice. Unless they are heard through an inclusive and collaborative approach, policy-makers will never truly understand what is needed to fix this country.

The people who hold power in Lebanon are not familiar with reality. They are simply too far removed from the country’s many communities and their suffering, and the solutions they are providing are irrelevant to the real and immediate needs of our most vulnerable.

I dedicate this editorial to these men and women, without whom this nation would no longer be standing.

Yasser Akkaoui
Editor-in-chief
INTRODUCTION

Building on the first draft of the economic roadmap published in the December 2018/January 2019 issue of Executive, this second draft includes an additional 261 measures and three entirely new national priorities that address judicial reform, labor, and how best to preserve national heritage. As was the intent from the beginning, we took a participatory approach in creating the first version of the roadmap, and that is especially true of the second draft. Over the last seven weeks, we have met with 60 individuals and civil society actors from all over Lebanon and sought their feedback on the roadmap and gathered their contributions for this revised draft. Here, I would like to give a special thank you to Halimé El Kaakour for her devotion to this project, for without her, this would have never worked. She helped us track down knowledgeable individuals all over the country and donated her time by reaching out to stakeholders and scheduling and attending meetings with us. We traveled all over the country from Tripoli to Rachaya, to ensure the concerns and ideas of citizens across Lebanon were heard. Additionally, we collected responses through an online form that made providing feedback accessible to all Lebanese. The stakeholders we talked to ranged from individual activists, to actors within INGOs and NGOS, to the heads of syndicates, to the chairman of the board and general manager of Blom Bank, Mr. Saad Azhari.

This was done in an effort to truly understand what Lebanese sought for the future of their country. We were surprised to find that most agreed on measures to be taken in many areas including gender inequality, transportation, pollution, education, health, poverty, and corruption. Contributors added their own ideas to these measures, making them stronger, but little disagreement existed on the main challenges in these national priorities.

Despite general consensus on most issues, one area in particular seemed to garner a large debate on what the future holds—build and reform. This section includes fiscal policy, capacity building, state institutions, regulatory frameworks, and now, judicial reform. It appears there is a lack of consensus on what economic system Lebanon should adopt. One of the biggest matters of debate is privatization. Where the roadmap’s original authors and new contributors, like Gilbert Doumit, advocate for privatization, others do not see privatization as the solution. Beirut Madinati is one such group. Others, like Marc Géara (a real estate developer and activist), suggest looking at privatization on a case-by-case basis and point to the recent public-private partnership law as a possible alternative.

This is a large and ongoing debate, one that is understandable given the broad spectrum of economic thought. Countries around the world have adopted systems best-suited to them, whether that includes a heavily privatized economy, or not. Ultimately, Lebanon has to decide what kind of system it wants to implement and move forward collectively. While the country is debating and deciding what kind of system it wants, Executive will be here to help facilitate the debate.

Combat

34 GENDER INEQUALITY
Action must be taken to eliminate violence against women and amend outdated, harmful laws.

37 POVERTY
The government must devise a sustainable policy to combat poverty.

40 CORRUPTION
Corruption has permeated all aspects of Lebanese society. Measures must be implemented to stop this.

44 POLLUTION
The government must act to alleviate the effects of pollution and implement reforms to reduce further pollution.

Develop

48 COMPETITIVENESS
Increase competitiveness of Lebanese producers in global markets.

50 ENTREPRENEURSHIP SUPPORT
To develop the economy, entrepreneurship endeavors must be incentivized and supported.

54 LABOR
Quantify and qualify labor pool to better meet labor market needs.

56 OUTREACH TO THE DIASPORA
Incentivize Lebanese expats to return and combat the country’s “brain drain.”

60 HERITAGE PRESERVATION
Reform legal structure regarding protection of cultural property.
There is quite a lot of concern regarding Lebanon’s fiscal performance and its debt outlook. In its Article IV reviews for Lebanon, the International Monetary Fund has repeatedly alerted officials that the debt burden could be the prime risk source compromising financial stability, and could prevent the government from attaining its economic objectives, stressing that a sustained and balanced fiscal adjustment is essential.

Many contend that the government needs to stabilize the debt-to-GDP ratio and gradually decrease it with growth-oriented policies, as was done during the first decade of the millennium. To what extent the escalation of the debt ratio is related to economic and fiscal policies adopted since the 1990s remains to be examined, as does if and how corruption contributed to the escalation of public debt in Lebanon beyond the growth of GDP. More specifically, since 2012, and in the context of overall increasing regional uncertainties and stresses, the Syrian crisis has contributed to a period of instability in the development of the debt-to-GDP ratio. Finally, the global, US-led pivot in the post-Great Recession period from minimal interest rates to a normalized interest rate regime has implications for the development of the debt burden and the cost of debt servicing by the Lebanese state. Additional factors that have played a role in the development of debt-to-GDP imbalances in Lebanon include domestic, political, and institutional distrust. For example, in the form of deadlocks in government formation and weakening trust in the judiciary. In the years after the peak of the Syrian crisis, in the mid-2010s, insufficient data in preparation for the adjustment of the public sector wage scales—plus not entirely transparent hiring in the public sector, due to different priorities and needs—have also contributed to precariously tilting the fiscal balance. The need for reform and development of fiscal measures for the Lebanese state is undeniable.

Being able to rely on a competitive and competent banking sector for support, the government and Banque du Liban (BDL), Lebanon’s central bank, have been innovative in the debt management and restructuring policy, but at a cost. Before CEDRE funds will be made available, genuine structural and institutional reforms are needed at all levels. The government can begin with short-term measures to build positive momentum, but structural reform cannot be postponed any longer—more of the same must follow, but with longer-term and more diversified instruments. Fiscal reform must introduce new instruments that are able to increase social justice and sustainability as well as incentivize private investments and greater economic activity. In addition, fiscal reform needs to be flanked by a proactive approach for aligning and developing the monetary policy and capital markets regime under the auspices of BDL, with the fiscal policies produced and implemented by the Ministry of Finance (MoF).

The fiscal reform policy must be contextualized, with measures that increase the primary surplus and rationalize expenditures; introduce institutional reforms to improve credibility, transparency, and planning; and initiate structural reforms to increase competitiveness and economic growth.
POLICY PRIORITY 1.1
BUILD FISCAL POLICY

Main Challenges

- Research tax base, tax incidence, and strengthen direct taxation
- Update tax instruments and rates, including income tax and value-added tax
- Develop (long-term) debt instruments
- Fulfill reform pledges linked to the CEDRE process and other commitments of the government

Proposed Measures

Measure 1.1.1
Commit to timely adoption of state budgets. Implement budgets with strict control, not to exceed spending targets, beginning with the 2019 budget. Commit to public consultations for future budgets, as prescribed in the MoF Citizen Budget 2018.

Measure 1.1.2
Expand comprehension of the size of the Lebanese tax base and incentivize participants in the informal economies to enroll in the formalized economy and pay taxes.

Measure 1.1.3
Improve tax collection and educate citizens on the benefits of taxation.

Measure 1.1.4
Disincentivize tax evasion and smooth the transition from tax evasion to tax compliance with help of grace periods and bridging measures.

Measure 1.1.5
Adopt digital tools to ease tax compliance and make taxation processes, including tax rates, more transparent, and inclusive of all economic sectors.

Measure 1.1.6
Launch work on a new, progressive tax policy.

Measure 1.1.7
Review and, if necessary, ameliorate existing proposals on achievement of greater tax efficiency and justice (unified income tax draft law).

Measure 1.1.8
Achieve greater transparency of fiscal expenditures and use of tax revenues by making disclosures of fiscal allocations and tax usage mandatory for all ministries and state agencies.

Measure 1.1.9
Introduce new modeling techniques at the MoF that enable better forecasting and evaluation of the impacts of tax measures.
Build & reform

**Agenda Priority 1**

**Measure 1.1.10**
Streamline the issuance of new debt instruments and provide the citizens with clear information about new debt needs and measures.

**Measure 1.1.11**
Help smooth out the debt burden through stronger activation of the secondary market. Publicly list all new debt instruments on the Beirut Stock Exchange (BSE) and/or Electronic Trading Platform (ETP).

**Measure 1.1.12**
Diligently pursue all structural reforms that relate to the improvement of the fiscal performance of Lebanon under existing commitments.

**POLICY PRIORITY 1.2**

**FISCAL POLICY ALIGNMENT WITH MONETARY STABILITY PRESERVATION AND A SOUND EXCHANGE RATE REGIME**

**Proposed Measures**

**Measure 1.2.1**
Maintain the dollar peg in the near and medium term, and identify appropriate timing and conditions to review the policy with the purpose of revision.

**Measure 1.2.2**
Establish a process for regular reviews of macroeconomic conditions in Lebanon, focusing on growth and stability.

**Measure 1.2.3**
Define economic trigger events to embark on measures for remedying the cost of the current dollar peg.

**Measure 1.2.4**
Provide more disclosure of the decision and rationales used by BDL for their monetary policy, interest rate decisions, and inflation targets.

**Measure 1.2.5**
Streamline the procedure for interactions between BDL and fiscal policy-makers, to make the decision-making processes and outcomes more transparent.

**Main Challenges**

- Align exchange rate regime with economic development
- Embellish monetary policy in the form of interest rate and inflation targeting
- Refine the relationship between BDL and the MoF
- Increase the depth of capital markets
Measure 1.2.6
Align fiscal policy with the stated objective of deepening capital markets in Lebanon through the incentivization of capital market operations. Encourage participation and investment in the Lebanese economy through usage of the new capital markets tool, the ETP (under design).

Measure 1.2.7
Encourage public listing of family-owned conglomerates and large businesses on the BSE.

Measure 1.2.8
Incentivize the floatation of young companies and startups, as well as small and medium enterprises, on the ETP.

Measure 1.2.9
Increase transparency and awareness of the mandate of the Capital Markets Authority in Lebanon.

Measure 1.2.10
Increase provision of technical support and fiscal incentives for the different classes of companies seeking to be newly listed.
Lebanon faces the challenges of a fast-moving globalized economy, but at the same time has a backlog of lost development in economic capacities, brought on by decades of internal and external conflicts and state inactivity. Capacity components that need overhaul are the legislative infrastructure for the public and private economy, in terms of code of commerce and the ease of doing business. Processes and potential pitfalls of privatizations of state-owned or state-affiliated enterprises need to be examined. The data foundations for economic and social planning need to be determined, and productivity in the public and private sectors also needs improvement.

Due to long neglect of these, and other economically decisive areas, capacities in the public and private sector must be newly developed. There are experts and professionals with the work ethic and know-how needed for public service, and capacity building is an urgent priority to improve the collection, analysis, and usage of data for public policy formation, fiscal modeling, and social programs. Also necessary is the development of public sector capacities to support productivity and improvements in all sectors, as well as the alignment of public and private entities through initiatives such as public-private partnership (PPP) projects or other forms of private sector involvement in the provision of public services.

Public sector employees must be trained in governance, assistance, and supervision so that they can not only support the PPP processes that were legislated in 2017, but also achieve proper governance within public institutions. Lebanon continues to lack proper statistics, upon which the formulation of economic policy must be based. So far, efforts to build a statistical database have been sparse, uncoordinated, and insufficient, hence the need for a master plan with the objective of building a long-term database. The principal objective of privatizing state-owned enterprises is to promote growth and modernize the economy, not to generate revenues. Privatization, which can take several forms (e.g., build-operate-transfer, management contracts, full or partial sale, partnership with strategic international investors, etc.), remains the main bridge that is expected to transform and modernize the Lebanese economy. Privatization, however, should be considered on a case-by-case basis. PPPs can offer a good alternative in many instances.

While restructuring state-owned enterprises and legislative development—including the introduction of a competition law and regulatory authority—remain a prerequisite to any successful privatization program, the government must fully commit to the privatization option and announce its intention to resume this program. Privatization should not be considered as an option to generate revenues to meet short-term fiscal needs, but must instead be viewed as a process that will yield dynamic economic benefits in the long run. In fact, there is an international consensus that typical practices of privatization among other things:

1. Attracts foreign and domestic direct investment and injects capital
2. Develops capital markets
3. Encourages new technologies and increases productivity
4. Provides better service at lower cost to domestic consumers
5. Promotes economic efficiency and competitiveness
POLICY PRIORITY 2.1
DEVELOP CAPACITIES FOR DATA COLLECTION, ANALYSIS, AND USE

Proposed Measures

Measure 2.1.1
Review the CAS’ capacities and invest in development of underpowered areas at the organization. This includes recruiting and training qualified statisticians and staff, and investing in data collection capabilities and software needed for analysis.

Measure 2.1.2
Legislate a census for Lebanon.

Measure 2.1.3
Implement the census.

Measure 2.1.4
Assist the CAS in developing a statistical master plan, and implement any agreements with foreign institutional counterparts. Integrate public and private sector stakeholders into the development of the statistical master plan for participation in its implementation.

Measure 2.1.5
Engage private sector stakeholders to supply anonymized data for statistical analysis needed for policy-making, and provide businesses with access to assist private sector decision-making.

POLICY PRIORITY 2.2
ENHANCE CAPACITIES IN THE PUBLIC SECTOR

Proposed Measures

Measure 2.2.1
Assess the level of technical competencies and gaps in public sector ministries and agencies.

Measure 2.2.2
Devise a plan to train or hire workers to fill identified gaps and determine the associated costs.
Build & reform

Agenda Priority 2

Main Challenges

- Address absence of effective financial markets
- Uplift policy framework including privatization program
- Overhaul foreign direct investment (FDI) promotion channels

POLICY PRIORITY 2.3
INCREASE PRODUCTIVITY

Proposed Measures

Measure 2.3.1
In collaboration with commercial banks, financial intermediaries, capital market stakeholders, and Banque du Liban (BDL), Lebanon’s central bank, establish various funds and capital markets instruments that will boost access to equity, credit, and investments.

Measure 2.3.2
Incentivize international joint ventures and technology transfer alliances by improving intellectual property rights protection, offering fiscal incentives, and removing non-tax barriers to businesses.

Measure 2.3.3
Invest in the institutional capacities and human capital of regulators that are deemed productivity boosters in financial markets, public services, and the real economy.

Measure 2.3.4
Encourage the attraction of FDI by upgrading investment agencies with more human capital and larger budgets for marketing and advertising in foreign jurisdictions, and increase incentives for inflows of FDI that contain technology transfer components.

POLICY PRIORITY 2.4
ENABLE THE BUSINESS AND INVESTMENT CLIMATE

Proposed Measures

Measure 2.4.1
Modernize existing laws pertaining to competition, anti-dumping, intellectual property, antitrust, small- and medium-sized enterprises, quality-enhancing, bankruptcy and insolvency, code of commerce, and the building code.

Measure 2.4.2
Create legislation that would allow for small debts recovery.

Measure 2.4.3
In the interest of improving trade facilitation, evaluate existing assessments, such as the World Bank’s Doing Business report and similar international benchmarks on practices and barriers in Lebanon. Evaluate and act to address these issues.
Build & reform

Measure 2.4.4
Introduce e-government solutions and improve omni-channel access to governmental procedures, such as customs, to reduce red tape on import and export trade procedures.

POLICY PRIORITY 2.5
MAKE PRIVATIZATION WORK

Main Challenges

- Remove barriers to privatization of state-owned enterprises
- Empower PPP framework
- Increase public sector understanding of privatization and PPP
- Improve oversight structures and mechanisms

Proposed Measures

Measure 2.5.1
Make state-owned enterprises market ready to operate as private sector entities.

Measure 2.5.2
Determine public good priorities to be met by privatized entities.

Measure 2.5.3
Activate capital markets in the context of privatization of state-owned enterprises.

Measure 2.5.4
Review privatization proposals on a case-by-case basis, and implement solutions to provide the services of privatized companies aligned with social and public interests.

Measure 2.5.5
Intensify existing nascent training of municipal, provincial, and national agencies in order to enable them to evaluate and manage PPP projects and procurements.

Measure 2.5.6
Empower independent oversight bodies that can contribute to the efficient delivery of services of PPPs, including the judiciary, regulatory bodies, and civil society.

• • •
Build & reform

Agenda Priority 3

BUILD STATE INSTITUTIONS

Public administration in Lebanon should adhere to meritocratic standards. As part of this paradigm, elected authorities should seek to reduce the size of the public sector. On the national level, a civil service revamp should include eliminating inefficient, budget-draining programs, departments, and agencies. On the sub-national level (regional and municipal administrations), the aim should be to decentralize decision-making, utilize new technologies, and increase productivity. Prerequisites for decentralization include: reformation of the legal and institutional setup of control institutions (e.g., public audit, civil service board, and central inspection); establishing a digital and transparent system for budget control and management; and restructuring districts according to economic parameters aimed at social cohesion. A merit-driven public administration would be the key to attracting foreign investment, creating jobs, and restoring confidence in the local economy.

POLICY PRIORITY 3.1
MODERNIZE THE CIVIL SERVICE

Proposed Measures

Measure 3.1.1
Develop new legislation to consolidate previous draft laws for decentralization at the municipality level.

Measure 3.1.2
Improve legislation for determining responsibilities and decentralization structures for levels beyond the municipality.

Measure 3.1.3
Decentralize decision-making and institutions by empowering local governments (i.e., with resources, enforcement capabilities and financial autonomy) and creating regional offices for service ministries.

Measure 3.1.4
Evaluate all holdings and assets of the state to identify and better allocate the use of these resources.

Measure 3.1.5
In the context of overhauling the civil service, examine options for early retirement packages to reduce staff bloat and redundancies of workers, particularly in quasi-public entities providing public services.

Main Challenges

- Tackle decentralization
- Overhaul the civil service
- Eliminate corruption and dead-end careers
Main Challenges

- Remove redundancies in the ministerial space
- Align political and economic objectives in distribution of public administration units

Measure 3.1.6
Redesign incentives including non-monetary incentives for civil service employees.

Measure 3.1.7
Enhance institutional oversight and accountability bodies with the aim of reducing corruption and improving public sector productivity (more policy targets and measures on combating corruption can be found in Agenda Priority 12).

Measure 3.1.8
Ensure the implementation of whistleblower protection legislation and adequate mechanisms for reporting infractions.

Measure 3.1.9
Align institutional development with a roadmap for e-government, and adjust organizational charts of public entities to comply with an e-government roadmap.

Measure 3.1.10
Restore the sole authority of the Civil Service Board as the oversight body for the examination and hiring of public sector employees.

POLICY PRIORITY 3.2
REFORM MINISTRIES AND AGENCIES

Proposed Measures

Measure 3.2.1
Examine the allocation of ministries and ministerial portfolios under economic and political perspectives, and reduce, if possible, the number of ministries to be more in line with international standards.

Measure 3.2.2
Consolidate agencies with overlapping authorities and functions as much as possible (such as the Council for Development and Reconstruction, the Council of the South, the Displaced Fund, and the Higher Relief Committee).

Measure 3.2.3
When warranted by economic needs, establish new institutional competencies, for example, independent agencies for export promotion or diaspora relations.
Agenda Priority 4

JUDICIAL REFORM

Lebanon’s current judicial system has been in place since the country’s independence, but this longevity belies the judiciary’s manifold (perceived) weaknesses. The points of concern include perceptions of weak independence and inefficiency, especially in the time lag on judgments achieved in judicial proceedings. Another aspect of concern is that confessional considerations have influenced the judicial selection process. Military conflicts in Lebanon in the second half of the 20th century affected the political system and the independence of the judiciary, eroding citizens’ confidence in both. Critics of the judicial system in civil society cite interference in the courts, particularly internal interference by judges in the Higher Judicial Council (HJC), as “commonplace.” These critics argue that every citizen needs to feel protected by the courts, regardless of their sect or standing in society. The current system does not provide this guarantee. Barriers against the possibility of holding public servants accountable for their actions, and possible infractions, have to be removed. Provision of immunity from legal repercussions for all public servants, including ministers, must be examined and, if necessary, amended to improve judicial accountability. Incentives for judges to avoid engaging in corrupt activities must be developed. The executive branch has significant influence in the selection process of the HJC, which is a violation of the democratic principle of the separation of powers. Structural problems may also arise from the HJC’s authority to transfer judges between posts without the judge’s consent. Civil society activists note that judges are appointed as consultants for various administrations, again blurring the lines of the separation of powers. This, moreover, becomes a way to bribe judges, as salaries increase for each additional consultancy position. In an independent judiciary, the principle of the immovability of judges is an integral factor. A judge’s qualifications, impartiality, and experience should be the basis for promotion. Currently, judges operate with little oversight, as no evaluation mechanism is in place to monitor effectiveness and competency after appointment.

POLICY PRIORITY 4.1
INCREASE ABILITY OF JUDICIARY TO FUNCTION INDEPENDENTLY

Main Challenges

- Improve access to judicial records
- Institute merit-based evaluation mechanism for judges
- Improve judicial independence
- Build resilience to corruption
- Align standards for Lebanese judiciary with international standards

Proposed Measures

Measure 4.1.1
Pass the draft law on judicial independence and transparency as a concrete measure toward building a strong judiciary.

Measure 4.1.2
Adopt periodic evaluation of judges and create a personnel file for each judge to track performance. Establish an objective criteria as a basis for appointments and promotions, and ensure that promotions are based on merit and competence.
Main Challenges

- Reform Higher Judicial Council
- Legislate and facilitate inclusion of officials
- Enhance integrity and transparency

**POLICY PRIORITY 4.2**

**IMPROVEMENT OF JUDICIAL INSTITUTIONS**

Proposed Measures

*Measure 4.1.3*
Integrate the principle of immovability of judges into current practices.

*Measure 4.1.4*
Improve recruitment of competent, quality judges by increasing impartialities in the entrance exam, limiting the weight of the oral exam in the final grade as this assessment is more vulnerable to the examiner’s biases.

*Measure 4.2.1*
Restructure HJC to ensure representation and independence of different categories and grades of judges.

*Measure 4.2.2*
Remove conflict of interest issues by addressing the practice of judges working as consultants for governmental administrative entities.

*Measure 4.2.3*
Adopt laws to ensure the complete financial and administrative independence of the judiciary.

*Measure 4.2.4*
Limit immunities of heads of state, ministers, legislators, and other public officials through the empowerment of the appropriate institutions under Article 80 of the Constitution of the Republic of Lebanon.

*Measure 4.2.5*
Embellish the framework for easing citizens’ access to non-court arbitration procedures, for example, by creating the position of ombudsman to support citizens’ pursuit of justice.
**Build & reform**

**Agenda Priority 5**

**BUILD REGULATORY FRAMEWORKS**

Legal and regulatory frameworks provide assurance to markets, offering a level and competitive playing field to businesses in an increasingly globalized and complex environment. A healthy legal and regulatory environment is one that continuously adapts local and national practices to international best practices. In Lebanon, many of these frameworks have not been kept up to standard, leaving regulators and the private sector to operate in uncertain business environments, less able to compete in the global economy. In order for the private sector to operate within a steady business environment that also enforces relevant laws and rules, Lebanon must appoint or re-mandate regulators that independently govern their relevant industries. Lebanon must emulate Banque du Liban (BDL), its central bank, which has continuously adopted and abided by international financial and banking standards. Other industries should lobby for regulatory frameworks that will allow corporations to embed cultures that are adaptive to change. Beyond these frameworks, buy-in and reinforcement of regulations are key to the success of their implementation.

**POLICY PRIORITY 5.1 MODERNIZE REGULATORY FRAMEWORK**

**Proposed Measures**

**Measure 5.1.1**
Establish a credit system that will reduce the risk exposure of banks and modernize the legal framework of credit guarantees and debt recovery procedures.

**Measure 5.1.2**
Appoint, rejuvenate, and empower the Telecom Regulatory Authority, the Lebanese Petroleum Administration, the Insurance Control Commission, and the Electricity Regulatory Authority to further empower independent regulatory institutions.

**Measure 5.1.3**
Reinforce the role of the CMA and provide it with the necessary resources to go beyond monitoring and assessing the markets to a market development function. The CMA should be responsive, facilitate enquiries by private investors, as well as establish a system of communication that is user friendly and efficient.

**Measure 5.1.4**
Proceed in the privatization of the Beirut Stock Exchange sal (BSE) and the Electronic Trading Platform (ETP).

**Measure 5.1.5**
Put in place incentives and regulatory frameworks to encourage the proliferation of, and financing and investment into, SMEs and startups, including incentives with emphasis on green investments.

**Main Challenges**

- Modernize the legislative framework against money laundering and hot money
- Assess and improve the enforceability of anti-corruption regulations
- Upgrade regulatory frameworks and incentives for small and medium enterprises
- Regulatory frameworks and incentives for startups, green projects and instruments
Measure 5.1.6
Develop new legislation to consolidate previous draft laws for the insurance sector to promote proper competition and better protect policy-holders.

Measure 5.1.7
Standardize operating procedures and codify health regulations in the hospitality sector.

Measure 5.1.8
Fully implement Law 28 (2017) on access to information and coordinate a national plan for combating corruption; issue auxiliary legislation to form the national anti-corruption commission.

Measure 5.1.9
Enhance competitiveness in the economy by passing legislation and measures to improve the doing business environment, as per Policy Priority 2.4: Enable the Business and Investment Climate.
Strategize

Agenda Priority 6

STRATEGIZE EDUCATION

Lebanon consistently scores highly on international educational rankings, however, there is a need to improve the quality of education across all public and private institutions, from kindergarten to high school, to universities and vocational schools. Academic institutions across the country are generally under-funded and operate with little oversight. There is little consistency in education policy and Lebanon’s students emerge into a labor market that is incapable of absorbing the high number of graduates, exacerbating the brain drain.

Lebanon’s educational system must provide access to all school-age students, a challenge that has become more acute in the face of the Syrian refugee crisis. Academic facilities across the country must be enhanced to accommodate and improve educational access for those with physical and intellectual disabilities.

The Ministry of Education and Higher Education (MoEHE) must build on best practices and existing programs to reform curricula, and build resilient and autonomous academic governing structures and educational institutions. Successful educational reform must focus on the core components of teaching, learning, and preparing children for the digital era. These reforms need to be made under the umbrella of the Center for Educational Research and Development (CERD). But first, CERD must be rejuvenated to operate at capacity. The MoEHE’s human resource strategy and structure also must be urgently addressed.

POLICY PRIORITY 6.1
CREATE A NATIONAL VISION FOR EDUCATION

Proposed Measures

Measure 6.1.1
Draft a new curriculum for elementary schools that puts skill building at the center, alongside content, and that focuses on the 8 Cs (curiosity, collaboration, composure, compassion, creativity, communication, collaboration, and citizenship).

Measure 6.1.2
Review and, if necessary, revise the content of the Lebanese Baccalaureate exams.

Measure 6.1.3
Develop a monitoring and evaluation mechanism that can be used to build a statistical foundation to measure and evaluate the quality of education.

Measure 6.1.4
Using the statistical database, incorporate evidence-based policy to review and, if necessary, revise the structure of the public education system, and strengthen governance and accountability.

Main Challenges

- Ensure national curricula are in line with international standards
- Prioritize new knowledge and national libraries
- Utilize existing networks and best practices
Main Challenges

- Diversify education
- Promote lifelong learning

Proposed Measures

**Measure 6.2.1**
Develop and support technical schools and incorporate alternative training across all institutions. Develop night school programs at secondary, technical, and university education levels to provide workers with the opportunity to develop their skills.
Strategize

Agenda Priority 6

Measure 6.2.2
Develop external programs at universities in collaboration with ministries, academic organizations, and other relevant parties to develop skill sets relevant to the private sector.

Measure 6.2.3
Subsidize software and language classes for part-time and full-time workers and those employed at enterprises that have 10 or fewer workers.

Measure 6.2.4
Offer incentives to employers so that businesses invest in their workforce and employees have access to continuing education programs.

POLICY PRIORITIES 6.3
STRENGTHEN PUBLIC EDUCATION

Main Challenges
- Standardize education
- Strengthen institutional autonomy

Proposed Measures

Measure 6.3.1
Establish a national accreditation board to review and, if necessary, revise licenses of academic institutions.

Measure 6.3.2
Amend governance and the legal framework of the Lebanese University to increase its independence with regard to the selection of all administrative posts, recruitment policy of professors, and research.

Measure 6.3.3
Empower the Lebanese University to seek non-governmental sources of funds (e.g., endowment).

Measure 6.3.4
Provide incentives for professors at the Lebanese University to seek research funding (e.g., reduce teaching load and incorporate into promotion policy).
STRATEGIZE HEALTH

A checkup on the overall robustness of the nation’s health infrastructure would show that the vital signs of the country’s health sector are generally good, albeit with some lingering concerns, such as reports of malpractice and medical insurance fraud. Further, it must be ensured that access to healthcare is available for everyone in Lebanon. This examination is in the context of Lebanon’s impromptu multi-year stress test—the unplanned influx of Syrian refugees that began accelerating in 2013, placing strain on Lebanon’s medical centers, hospitals, and primary health facilities—during which the health system has not buckled.

The overall diagnosis is that the healthcare sector requires coordinated development between the public sector and the for-profit and nonprofit private sectors. The private sector needs to learn from the experiences of public health institutions and the Ministry of Public Health (MoPH) over the last few years, adopting lessons learned and best practices. Greater attention must be paid to public health issues, like the harmful effects of open waste burning.

On the public sector side, there are any number of improvements that still need to be made. This should begin with a restructuring of the MoPH, where manpower seems to be overstretched and has thus far not been reorganized due to political interference. Working on the issues that the ministry has not addressed—such as closing coverage gaps and eliminating structures that are producing inequalities in these areas—must also be prioritized. The ministry must hone its ability to regulate and supervise, and it has made progress on that front. Greater effort must be made to reposition the MoPH as a regulatory body, pivoting away from its service delivery role.

Both public and private health institutions need to create a better popular understanding of the connections between their work and mutual collaboration, and the benefits to overall public health. Stakeholders seem not to have coordinated their public relations in this regard, and private stakeholders are stuck in a sort of family business mentality when it comes to communication, or the lack thereof, with the media. Awareness building within the general population must become a greater priority, necessitating clear communication strategies and greater transparency from the private sector, the MoPH, and public health institutions.

POLICY PRIORITY 7.1
MODERNIZE LEGISLATIVE AND INSTITUTIONAL FRAMEWORK

Proposed Measures

Measure 7.1.1
Organize a health forum where stakeholders can contribute to support the national strategy and manage expectations and priorities. The forum can also serve as a platform to communicate policy direction and outcomes with the media and public.

Measure 7.1.2
Assess and revise licensing of health facilities and identify new criteria for medical centers to operate under. After institutions are accredited, implement follow-up checks to ensure standards are consistently met.

Main Challenges

- Define the role and mandate of the MoPH
- Improve hospital supervision
- Improve patient rights
Strategize

Agenda Priority 7

Main Challenges

- Public funds and social security
- Military health funds
- Private insurance

Proposed Measures

**Measure 7.1.3**
Establish an autonomous regulatory agency that collaborates with the MoPH to regulate the pharmaceutical sector, with its main objectives being to ensure high standards, fair competition, and equal access.

**Measure 7.1.4**
Engage with the Order of Physicians to introduce sanction mechanisms regarding the handling of medical malpractice lawsuits or complaints.

**Measure 7.1.5**
Digitize personal medical records, starting with first contact at primary health care centers, to be used at secondary and tertiary medical facilities.

**Measure 7.1.6**
Put together a national committee that, in collaboration with the National Council for Scientific Research, the World Health Organization, and international organizations, will define a research agenda for health priorities and seek yearly grants.

**POLICY PRIORITY 7.2**

**IMPROVE SOCIAL INSURANCE SYSTEMS**

**Proposed Measures**

**Measure 7.2.1**
Activate the role of the intra-agency technical committee that represents all healthcare related funds to map the current situation, identify overlaps and forms for abuse, and present a set of recommendations. Publish the report and hold parties accountable to implement the recommendations.

**Measure 7.2.2**
Finalize the automation of the National Social Security Fund and introduce web-enabled services, starting with tracking applications and direct wiring of refunds for eligible beneficiaries.

**Measure 7.2.3**
Empower the Insurance Control Commission and transform it into an independent regulatory agency.
POLICY PRIORITY 7.3
LAUNCH AN EDUCATIONAL AND CIVIL SERVICE CAMPAIGN

Main Challenges

• Raise awareness of preventive health
• Raise public awareness of health-related issues

Proposed Measures

Measure 7.3.1
Offer free wellness packages at primary healthcare centers for individuals who fit the criteria for extreme poverty. Subsidize an annual general checkup at select hospitals for citizens of low-income status, and all citizens above the age of 50.

Measure 7.3.2
Develop nursing programs and a faculty of nursing as part of Lebanese University, which would include internships at hospitals in rural or impoverished areas, or in mobile clinics.

Measure 7.3.3
Launch year-long public awareness campaigns targeting seasonal, communicable, and non-communicable diseases and ways to prevent and combat them, and run campaigns explaining the right to healthcare and how to exercise it.

POLICY PRIORITY 7.4
IMPROVE PUBLIC HEALTH

Main Challenges

• Boost recycling efforts
• Stop uncontrolled waste burning
• Improve food safety and restaurant inspections

Proposed Measures

Measure 7.4.1
Launch awareness programs in all schools to teach children about recycling and conservation, and ensure that schools recycle.

Measure 7.4.2
Create a comprehensive public health strategy to tackle the health problems resulting from uncontrolled waste burning.

Measure 7.4.3
Implement Law 35 (2015) on food safety, including the Food Safety Lebanese Commission (FSLC). Train inspectors and ensure they have adequate capacity to carry out inspections.
Strategize

Agenda Priority 8

STRATEGIZE ENERGY

Lebanon’s power sector is essential to economic development, yet it has turned into a heavy burden due to inefficiencies. If properly run and operated, it could easily become a major target of foreign direct investment, and a primary catalyst for economic growth. Over the past decades, the power sector—primarily because of the public utility, Electricité du Liban (EDL)—has consumed billions of dollars from the treasury, due to annual deficits of $1.5-$2 billion, depending on fuel prices, thus contributing up to 40 percent of the public debt. Meanwhile, service provision has worsened over the years (as the electrical grid deteriorates). The situation is alarming and necessitates immediate, yet sustainable, action. Lebanon is moving forward on oil and gas exploration, and hopefully the country will find and extract enough natural gas resources to at least fuel domestic power generation, even if exports to foreign markets prove elusive.

While the power sector requires that sustainable solutions be implemented sooner rather than later, switching to natural gas in anticipation of the discovery of local reserves will not only prepare the power sector for that phase, but is also cheaper than the oil fuel currently being used, and more environmentally friendly, reducing the sector’s greenhouse gas emissions. To uphold commitments to the 2015 Paris Agreement on climate change, Lebanon must continue to invest in renewable energy generation, taking advantage of the country’s abundant renewable resources, thus diversifying the country’s energy sources, decreasing its dependence on fossil fuels (with their price volatility), and improving the country’s energy security.

POLICY PRIORITY 8

DEVELOP AND IMPLEMENT A SUSTAINABLE ENERGY POLICY

Proposed Measures

Measure 8.1
Reduce the fiscal deficit in the power sector through the reduction of non-technical losses and the gradual removal of subsidies in line with an increase in power generation, as well as significantly reduce illegal connections, and implement more efficient bill collection, so that all Lebanese have equal access to electricity and pay their fair share.

Measure 8.2
Fully implement Law 462 (2002) by appointing an independent regulatory authority to regulate the sector and restructuring EDL. The electricity utility should be unbundled and separated into generation and distribution companies, potentially keeping the transmission component under the auspices of EDL. The strategy should draw on lessons learned from previous policies and studies to develop and implement solutions to modernize the sector and turn it profitable by, among other things, involving the private sector through a public-private partnership. This may reduce the size of the workforce needed at EDL, while making clear what the utility needs in terms of skills and manpower.

Main Challenges

- Increase power generation
- Fix EDL
- Absence of comprehensive and inclusive national oil and gas strategy
- Strategies for offshore and onshore exploration
- Develop regional partnerships and grid networks
- Increase competition in the gas and fuel import markets
- Boost the share of gas in the energy mix
Measure 8.3
EDL’s Master Plan for grid reinforcement must be quickly implemented. The national electricity grid is weak and cannot handle additional capacity, as evidenced by the 2018 hook-up of a second power barge in Zouk Mosbeh, which could not generate at full capacity. Electrical load capacity of the grid will only be aggravated by additional intermittent power generation, such as renewable energy.

Measure 8.4
Implement plans to import natural gas, which is cheaper and cleaner than the currently used fuel oil (until such time as Lebanon produces natural gas, if it is able to) and develop an infrastructure for the supply and distribution of gas—building a pipeline connecting coastal power plants, for instance, or contracting out the necessary gas import technology where necessary.

Measure 8.5
Develop a comprehensive energy strategy, through a process of stakeholder engagement, that increases power generation and distribution efficiency at optimal cost to secure Lebanon’s long-term energy needs and improve overall sector governance.

Measure 8.6
Develop a national oil and gas strategy that would forecast different scenarios and assess them based on: market prices, sizes of discoveries, types of hydrocarbons found, development solutions for fields, costs of exploration and production, market conditions, geopolitics, and domestic politics and market.

Measure 8.7
Fully integrate Lebanon into the six-nation power grid and regional gas pipelines, in addition to networks linking the Middle East with the European Union. This presents vast opportunities for Lebanon in terms of imports and, potentially, future exports if Lebanon discovers oil or gas, and employs electricity generated from renewable energy sources for better grid integration and balancing of the systems.

Measure 8.8
Implement plans to enhance transparency and improve competition in the upstream, midstream, and downstream gas and fuel import markets.

Measure 8.9
Incentivize the development of an upstream market, and develop services and logistics across the entire extractives value chain, promoting Lebanon as a regional hub for international companies active in the Eastern Mediterranean.
Strategize

Agenda Priority 8

Measure 8.10
Increase the share of gas in the energy mix, starting with power production. In case of commercial gas discoveries, encourage consumption of local gas in the transport sector and in the development of a petrochemical industry.

Measure 8.11
Implement clean energy production incentive tools. This can be done by amending Law 462 (2012) to allow feed-in tariffs (FIT) to be introduced, or by introducing net metering that would allow consumers to inject power generated at their premises into the grid.

Measure 8.12
Pass the draft energy efficiency law, which would provide the Ministry of Energy and Water with a framework for mainstreaming energy efficiency and renewables management in Lebanon.
Lebanon is blessed with substantial natural water resources, including surface water, groundwater, and spring water, but little has been accomplished in the way of conservation or sustainable exploitation of these resources. Mismanagement, outdated storage infrastructure, inefficiencies across the sector, and the influx of Syrian refugees have increased water stress and water scarcity. Currently, the Ministry of Energy and Water (MoEW) is largely understaffed and past attempts to reorganize managing bodies have fallen short. The confluence of these factors has left most of the country to rely on costly private distribution networks. Further, tap water is not safe to drink. The development of the water sector and related transportation infrastructure is crucial to the future diversification of the Lebanese economy.

While Law 221 (2000) reformed the governance of the water sector, creating four regional water authorities under the supervision of the MoEW, this restructuring has not been successful and mismanagement still runs rampant. Outdated storage facilities lead to leaks and lost water, and Lebanon’s karst topography makes leakage from dams common. Further, of the 12 planned dam projects as of 2015, only two are operational today: the Qaraoun dam and the Chabrouh dam. While there are laws that govern well digging, it is estimated that 80 percent of wells in Lebanon were dug illegally, diminishing the supply from public wells. In the agriculture sector, which accounts for 61 percent of the country’s water usage, inefficient irrigation practices are another cause for concern. All these inefficiencies equate to a colossal waste of water, and efforts must be taken to upgrade storage facilities, and transport networks, and rethink current practices regarding pricing and distribution.

Beyond inefficiencies and mismanagement, a flat rate is charged for water usage that does not reflect actual consumption. There is consequently little incentive to conserve water, and there is a lack of public awareness about water conservation. The last national water strategy, drafted in 2010, is outdated and must be altered to address the current challenges in the sector. The construction and maintenance of an efficient water distribution system would improve delivery to citizens. It is imperative to upgrade storage facilities and existing delivery systems and networks.

**POLICY PRIORITY 9.1**

**UPDATE WATER STRATEGY AND SECTOR GOVERNANCE**

**Main Challenges**

- Create a coherent national plan
- Define organizational structure of governing entities
- Revise current water pricing regime
- Explore hydropower options

**Proposed Measures**

**Measure 9.1.1**
Create a more coherent Water Master Plan, building on the National Water Sector Strategy (2010).

**Measure 9.1.2**
Follow up on the consolidation of the regional water authorities and define their organizational structure and mandate. Increase coordination between the Regional Water and Wastewater Establishment, the MoEW, and other relevant government agencies.
Strategize

Agenda Priority 9

**Measure 9.1.3**
Modernize existing hydropower generation units and study potential for additional power generation, taking into account development plans and ecological needs.

**Measure 9.1.4**
Reassess the current pricing scheme and introduce a new water tariff regime that is connected to the actual usage of water by the consumer. To do this, water metering must be implemented throughout the country.

**Measure 9.1.5**
Support and modernize water-based energy plants and identify other opportunities to generate power.

**POLICY PRIORITY 9.2**
**MAXIMIZE EFFICIENCY ACROSS THE SECTOR TO REDUCE LOSSES**

**Proposed Measures**

**Measure 9.2.1**
Revise all licenses granted to mineral water firms and introduce quality control and regulatory criteria. Manage all drinking water companies under this regime.

**Measure 9.2.2**
Assess and strategize optimal efficiency of water transport infrastructure.

**Measure 9.2.3**
Review and assess the capacity of the existing water distribution systems in urban and rural centers to reduce waste and transport costs, and improve usage efficiency.

**Measure 9.2.4**
Assess and optimize efficiency of water use by factories and industry.

**Measure 9.2.5**
Ensure continuous access to quality water by enforcing the prohibition of illegal well drilling, and incentivize efficient management of groundwater resources in urban and rural settings. Reduce extraction from private wells and ensure responsible usage of public wells.

**Measure 9.2.6**
Assess and optimize efficiency of water use by farms and the agricultural sector. Reduce inefficiencies in the agriculture sector by increasing the usage of more efficient irrigation systems, such as drip irrigation.

**Measure 9.2.7**
Research, design, and launch a public awareness campaign that teaches conservation in schools.

Main Challenges

- Improve access to drinkable water through licensing, distribution, and health regulations
- Upgrade storage facilities and water transport infrastructure
- Enforce laws regarding well digging
- Increase efficiency in the agriculture sector
STRATEGIZE TRANSPORT

In the second half of the 20th century—while Lebanon was in the throes of internal strife—the diversity, intensity, and overall importance of global trade increased tremendously. All mobility categories—land, sea, and air—benefited from technical innovations that ranged from the rise of container shipping and efficiency gains in commercial aviation to the introduction of electric, alternative mobility, and sharing solutions in landbound and urban transport. Having remained partially isolated from new transportation developments during the civil war (1975-1990), Lebanon has, in the three post-conflict decades, failed to catch up—achieving only partial inclusion in recent global transportation sector developments.

Missed opportunities for reaping greater economic and social benefits relate to infrastructure and operations across all modes of transportation. This translates into lost economic benefits thanks to the sub-optimal utilization of the country’s geographic location, which gives it an advantage in areas such as commercial shipping. Additionally, transportation infrastructure inefficiencies have obstructed the realization of tourism potentials in a variety of segments, from religious and ecological to leisure and cultural tourism, and have also limited Lebanon’s potential as an aviation hub. Moreover, inefficiencies and infrastructure problems in domestic mobility, as well as over-reliance on individual and quasi-individual transport in and between urban centers, are contributing to social risks (for example, medical and environmental) and to high direct losses and opportunity costs in the economy (due to traffic congestions, above-average vehicular damage incidents, etc.).

To address its weaknesses in all modes of transportation, Lebanon must develop maritime and aviation transportation infrastructure, motorways, secondary roads, urban transport nodes, and rail networks. Improvements to domestic mobility infrastructures—such as internally linking Lebanese ports and cities, and externally improving connections to neighboring countries—would not only create important direct revenues and translate into indirect opportunities for economic gains in inbound tourism and regional transit trade, but also make Lebanon a regional transit hub in the Eastern Mediterranean. The lack of a coherent strategy for cross-border and national transport in general, and the absence of plans for more specific domestic needs, such as preventive maintenance of inter-urban and urban mobility infrastructures throughout the country, has been identified as a drag on the Lebanese economy. Knowledge of the insufficient and fragmented allocation of funds to transportation infrastructure developments makes it even more important to strategize mobility and transportation as one pillar of a national economic plan.

POLICY PRIORITY 10.1
DEVELOP A TRANSPORT POLICY FOR NATIONAL AND CROSS-BORDER MOBILITY

Main Challenges

- Reinvent public transport: Intercity and intracity
- Enable maritime, air, and commercial transport

Proposed Measures

**Measure 10.1.1**

Develop a comprehensive public transportation policy that will regulate intracity and intercity transport. Policy will include taxi and bus service licensing, public parking, and a penalty system for reckless driving to be implemented across the country.
Strategize

Agenda Priority 10

Measure 10.1.2
Develop frameworks organizing commercial transport and integrating all Lebanese ports and airports into advanced digitized traffic management systems and modern, durable traffic networks.

Measure 10.1.3
Prioritize intracity transportation development with a strong public transport component for Greater Beirut, based on implementing the $300 million World Bank public transport plan that was adopted as Decree 66 (2017) by the Council of Ministers.

Measure 10.1.4
Enhance intercity public transport by creating and mapping national bus transport networks and completing the railway line between Tripoli and Damascus.

Measure 10.1.5
Improve urban mobility through the designation of bus lanes and the demarcation of routes for those using alternative modes of transport—for instance, cycle paths that facilitate bike riding on a municipal level and allow cyclists to move between cities.

Measure 10.1.6
Implement advanced toll road and traffic guidance schemes for highways outside of Greater Beirut that can satisfy requirements for the control of traffic flows and the mitigation of accident risks, and that can also generate revenue to finance road maintenance.

Measure 10.1.7
Develop Rene Mouawad Air Base as a commercial airport, and link the terminal to the Tripoli Seaport and the planned Tripoli Economic Zone via a rail and road network.

POLICY PRIORITY 10.2
IMPROVE URBAN MOBILITY AND ENVIRONMENTAL COMPATIBILITY OF TRANSPORT

Main Challenges
- Develop standards and ethics in enforcement of transportation behavior
- Enforce driving codes and public parking
- Incentivize environmentally compatible modes of transport

Proposed Measures

Measure 10.2.1
Empower the national police force and municipal police departments to strictly enforce Law 243 (2012) on traffic regulation by installing speed cameras at major intersections and on highways. Amend the law to penalize littering and automate the public safety monitoring and enforcement mechanism for the prosecution of traffic violations.
Measure 10.2.2
Develop the ethics of traffic control officers, whether municipal or national police, and incentivize ethical behavior by introducing performance metrics and a feedback mechanism for motorists.

Measure 10.2.3
Introduce build-operate-transfer (BOT) financing for underground public parking projects, to be covered at the ground level by greenery and gardens or other public spaces that meet environmental, urban planning, and urban living standards in cities. Standardize rates for long-term and residential parking.

Measure 10.2.4
Regulate the valet parking industry and impose heavy penalties on restaurants whose valets monopolize residential parking spots or drive unsafely.

Measure 10.2.5
Require all municipalities and authorities supervising highways to uphold road safety maintenance in every sense, including: the upkeep of security barriers, the development and maintenance of signage, and the upgrading of road surfaces.

Measure 10.2.6
Require municipalities to develop and accommodate safe pedestrian environments, by, for instance, clearing sidewalks and enforcing their use for pedestrian traffic by removing vehicles and other structures that impede pedestrian movement on sidewalks. Municipalities must impose and enforce pedestrian right-of-way in all urban areas with zebra crossings and places for pedestrians to cross major thoroughfares, in order to improve walkability and safety.

Measure 10.2.7
Protect mobility of pedestrians and secure zones with special rights for traffic participants with impaired mobility. Develop infrastructure for rentable e-bikes and protect pathways reserved for non-motorized users, such as bicycles or persons pushing baby strollers.

Measure 10.2.8
Revise and align registration fees and road tax regimes for new, fuel-efficient, compact cars in corporate vehicle fleets, with the aim of shifting toward less-polluting vehicles.

Measure 10.2.9
Provide private households with incentives for adopting less-polluting modes of transport, through measures ranging from tax rebates for buyers of electric vehicles and daily users of public transport, to increases in annual road taxes for old and polluting vehicles. Incentivize private vehicle owners to replace old, polluting vehicles with new vehicles that comply with advanced emission standards.
COMBAT GENDER INEQUALITY

Violations of women’s rights are not just detrimental to society, human rights, and the dignity of women, but are also extremely damaging to a country’s prospects for sustainable economic development. Lebanon has made some inroads toward correcting the injustices inflicted on women, but substantial work is still needed. Lebanon has a reputation for openness, but in reality the country lags behind others in the region, such as some North African Arab states that have introduced laws that have considerably improved the social and economic status of women.

There are some positive indicators concerning Lebanese women’s level of education, but these do not reflect their real status or participation in the labor force, their role within the family, or the general attitude of society—attitudes that are not only problematic for gender equality but also for gender or sexual orientation. Lebanon still lacks proper civil laws guaranteeing equal rights for women, and there are various legal constraints that discriminate against women at home and work. Societal attitudes and perceptions continue to subordinate women, suppressing their innovation, creativity, productivity, and—most importantly—their basic freedoms. Lebanon still has reservations about some major international conventions and has yet to reform domestic laws, change unfair customs (e.g., unequal employment opportunities and family status laws), and combat gender-based violence, including harassment in schools, universities, and the public and private sectors. There are insufficient laws protecting the rights of women, and insufficient institutional support when women are facing the judiciary. Lebanese laws must be brought in line with international conventions, and stakeholders must work together through a grassroots campaign to cement equality in practice. Empowering women is not only a fundamental social and human right, but also a pillar of sustainable economic development—we need gender equality at all levels to develop the country further.

POLICY PRIORITY 11.1
REFORM LAWS TO ADD PROTECTIONS FOR WOMEN

Main Challenges

- Enforce legislation designed to protect women
- Provide additional legal and social protections for victims of gender-based violence
- Adopt, without reservations, international conventions on women’s rights

Proposed Measures

Measure 11.1.1
Reinforce the implementation of Law 293 (2014) against domestic violence.

Measure 11.1.2
Support and develop projects with civil society to raise awareness on women’s issues (e.g., wage gap, personal status, sexual harassment in the workplace and public spaces) and to train and support women for merit-based advancement in the workplace.
Measure 11.1.3
Mandate by law an increase in parental leave—maternity and paternity—and allow flexible work schedules for parents.

Measure 11.1.4
Introduce new legislation or amend the criminal code to outlaw gender-based violence (e.g., marital rape, sexual harassment). Adopt a unified civil personal status law, guaranteeing gender equality that is compliant with the constitution and the international commitments of Lebanon.

Measure 11.1.5
Lebanon has adopted the Convention on the Elimination of All Forms of Discrimination Against Women (CEDAW), but maintains reservations about some articles. Lebanon should adopt CEDAW in its entirety, without reservations. The Optional Protocol, which was included as an addendum to CEDAW, has still not been adopted by Lebanon. Additionally, UN Security Council Resolution 1325 on women, peace and security must be integrated into state legal and regulatory policies to better protect women during and after armed conflicts.

Measure 11.1.6
Launch a long-term technical assistance project under the mandate of the new Office of the Minister of State for the Social and Economic Empowerment of Youth and Women to revamp laws and regulations dealing with women’s issues. Recommend and support the minister to develop and publish an action plan to amend or abolish legislation or regulations that discriminate against women.

Measure 11.1.7
Set up women’s shelters across the country that provide safe spaces in which women can seek refuge and receive help.

Measure 11.1.8
Amend Decree 15 (1925) on Lebanese nationality to ensure that children and spouses of Lebanese women have the same right to citizenship as those of Lebanese men.

Measure 11.1.9
Abolish Article 534 from the Lebanese penal code. Article 534 compromises the safety and protection of LGBTQ individuals and groups by subjecting them to physical, psychological, and economic harm.
POLICY PRIORITY 11.2
EMPOWER WOMEN AND ENCOURAGE PARTICIPATION

Proposed Measures

Measure 11.2.1
Put in place systems to provide women with a path to leadership positions in public and private institutions. For example, staffing police departments with trained policewomen and social workers to provide assistance and protection against any kind of harassment, discrimination, and gender-based violence. Protect and encourage structural and societal changes to make this possible.

Measure 11.2.2
Introduce capacity building measures to train judges, law officers, and journalists on gender issues, international conventions, and cultural discrimination.

Measure 11.2.3
Offer specialized training to women so that they can develop skill sets that make them more competitive in the labor market.

POLICY PRIORITY 11.3
INCREASE THE NUMBER OF WOMEN IN LEADERSHIP ROLES

Proposed Measures

Measure 11.3.1
Strengthen the Office of Minister of State for the Social and Economic Empowerment of Youth and Women by allocating money to the institution in the 2019 and subsequent state budgets.

Measure 11.3.2
Establish a ministerial committee with additional stakeholders from the judiciary, private sector, and civil society to develop and monitor the progress of a national plan aimed at women’s empowerment.

Measure 11.3.3
Ensure political appointments are merit-based, and that women are not excluded from being considered for these roles on the basis of sex.

Measure 11.3.4
Encourage the private sector to appoint women to senior posts by increasing awareness of women’s equal leadership capabilities through public awareness campaigns.
COMBAT POVERTY

Targets to eradicate extreme poverty and hunger were ranked as goal number one when the global community adopted the Millennium Development Goals (MDGs), at the United Nations, in the September 2000 Millennium Declaration. Accomplishments toward poverty eradication—such as the reduction of extreme poverty rates by more than half when comparing 2015 to 1990, and the reduction of undernourishment by almost half in the same period—encouraged UN member states to declare ending poverty “in all its forms everywhere” as Sustainable Development Goal 1 (SDG 1) in September 2015. The 2018 SDG progress evaluation report notes, “While extreme poverty has eased considerably since 1990, pockets of the worst forms of poverty persist. Ending poverty requires universal social protection systems aimed at safeguarding all individuals throughout the life cycle. It also requires targeted measures to reduce vulnerability to disasters and to address specific underserved geographic areas within each country.” While other agendas pushed by special interest groups in politics, business, or civil society may be controversial in the national debates of many countries, the validity and urgency of SDG 1 is undisputed by the global community. Lebanon is generally understood as needing to make more progress toward the implementation of SDG 1 by the SDG target year, 2030. Due to fiscal, monetary, or political constraints, successive Lebanese governments have failed to devise a comprehensive social safety plan, dumping most of the workload on NGOs and international donors, and intervening only to meet the bare minimum of needs, with limited resources allocated to line ministries. Lebanon’s government must detail policy on human and social development in its Ministerial Declaration, with clearly defined objectives and concrete proposals, as well as timelines for poverty reduction. The exploration and expansion of poverty reduction efforts on the national level deserve the attention of political stakeholders, civil servants, and elected officials, but also need support from religious institutions (as the traditional providers of poverty alleviation in Lebanese communities), wider civil society (including charitable and humanitarian non-governmental organizations), and private sector individuals and institutions (from schools and microfinance institutions, to manufacturers and banks). The years since the adoption of the MDGs and SDGs have witnessed increasing participation of private sector businesses, with the rise of corporate citizenship or corporate social responsibility (CSR). Evaluation, encouragement, and further development of public and private sector efforts toward the achievement of SDG 1 must be integral to the process of designing any plan for the Lebanese economy.
Combat

Agenda Priority 12

Main Challenges

- Address the lack of a poverty eradication strategy for Lebanon
- Modernize the legislative framework
- Protect vulnerable population groups against modern slavery

Proposed Measures

**Measure 12.1.1**
Establish a permanent ministerial committee, including participants from civil society and international development organizations, to develop and implement a poverty reduction strategy.

**Measure 12.1.2**
Create/empower a poverty eradication task force that links together members of Parliament and parliamentary committees whose purviews include working on populations that are vulnerable to poverty (e.g., women and children, displaced and refugees, disabled or aged persons, and all those in need of medical support).

**Measure 12.1.3**
Legislate, adopt, and finance, with the collaboration of the World Bank, the UN, the Central Administration of Statistics, and the Ministry of Social Affairs, direct support schemes for the poor in all categories mentioned in Measure 12.1.2.

**Measure 12.1.4**
Combat illegal child labor and trafficking, and the abuse of children, by cracking down on violators.

**Measure 12.1.5**
Implement (i.e., pass implementation decrees for) the ratified law on disability.

**Measure 12.1.6**
Align legal and operational frameworks for poverty eradication with frameworks for labor (Agenda Priority 17) and health strategy (Agenda Priority 7).
Main Challenges

- Ensure safety nets exist for those below the poverty line
- Expand and modernize existing rudimentary social security
- Upgrade safety nets for dealing with poverty in old age
- Implement targeted support schemes and microfinance
- Improve NGO financing legislation to ease ability to donate

Proposed Measures

**Measure 12.2.1**
Re-launch cooperation with the World Bank to devise and enact viable safety net programs, including direct payments to those below the poverty line.

**Measure 12.2.2**
Update and incrementally increase social safety for populations living below the upper poverty line.

**Measure 12.2.3**
Develop mechanisms to alleviate poverty in old age by improving social security and health or medical care provision schemes for those above 65.

**Measure 12.2.4**
Improve economic mobility by targeting and enabling financial inclusion and by providing incentives to the poor to enroll in nano and microfinance schemes.

**Measure 12.2.5**
Incentivize organizations in the microfinance institutions sector to further extend their reach, building on updated regulations and the increased financing options made possible by 2018 circulars from Banque du Liban (BDL), Lebanon’s central bank. Incentivize use of digital tools, such as mobile applications, in the provision of services of microcredit, microsavings, and microinsurance.

**Measure 12.2.6**
Make corporate and personal donations tax deductible for those who donate to qualifying public utility organizations, charities, and NGOs.
Corruption—defined in this case as the misuse of public posts for personal gain—is a popular and recurring talking point in Lebanon. It regularly finds its way into political speeches, media reports, street demonstrations, and the day-to-day small talk of the Lebanese at home and abroad. Corruption in Lebanon is perceived as pervasive. Meanwhile, international research into corruption indicates that grand and petty corruption—meaning incidents involving large spending measures on a national and sub-national level as well as citizens’ inability to obtain services without “greasing the wheels” when dealing with public servants—can significantly distort economic performances at the national as well as individual level. Citizens and political leaders have long been emphasizing that something must be done in Lebanon to curb these forms of corruption.

Despite many years of complaints from citizens and lip-service from politicians, little is done to achieve concrete progress in this regard, let alone engage in serious dialogue on the matter. Instead, corruption is often viewed as someone else’s vice. When public figures are confronted with evidence implicating them, the standard response is political manipulation against the backdrop of prevalent public complacency (“Everybody else is doing it!”). This chronic lack of self-reflection and systemic inaction is enabled by a combination of factors, including serious legal loopholes, persistent institutional failures, blatant political interference, and the systemic exploitation of confessional and regional identities.

Lebanon appears to be in a perpetual state of impunity that fuels corruption and sends the wrong message to Lebanese society and the world at large. Despite the limited engagement of politicians, state institutions, and international partners on anti-corruption since the end of the civil war, the last two years have witnessed some steps in the right direction. Those steps include the passage of new laws (e.g., access to information) after more than a decade-long process and the announcement of the country’s first national anti-corruption strategy after nearly seven years of incremental work behind the scenes. As they stand today, however, such steps are not likely to induce a tangible change for Lebanon, especially given the country’s notorious reputation for poor law enforcement, and the fact that the national strategy has not been formally adopted, or provided with the necessary financial and human resources to be implemented. In the years since the United Nations adopted the Convention Against Corruption (2006), the concepts of what constitutes corruption have widened, and perception of the problem has begun to include many historic forms of social links, such as the kinds of communal influences and intra-communal allegiances that have traditionally been relevant in all cultures. However, in the fragmented social fabric of the Lebanese Republic, there seems to be an increase in incidents where such wider forms of social intervention associated with the term corruption translate into barriers against entrepreneurship, business innovation, competitiveness, and job creation.

Meanwhile, other longstanding realities on the ground do not seem to be encouraging. For instance, it is still the exception rather than the rule for politicians assuming office to limit conflicts of interest by resigning from a post, suspending the exercise of a profession, or freezing membership in a club. All these indications of pervasive corruption need nuanced and effective responses in order to curb and control grand, petty, political, private, and social corruption.
POLICY PRIORITY 13.1
PROMOTE AND INCREASE TRANSPARENCY

Proposed Measures

Measure 13.1.1
Support and regularly monitor compliance with Law 28 (2017) on access to information, including the appointment and training of information officers in all administrations and the publication of all information required by the law.

Measure 13.1.2
Set up an independent permanent committee grouping governmental and nongovernmental experts to track and publicly report on Lebanon’s implementation of the UN Convention against Corruption and make recommendations for enhanced implementation.

Measure 13.1.3
Adopt and support the effective implementation of legislative amendments that modernize the country’s system for the declaration of wealth by public officials to make it more efficient, and ensure that the declarations are submitted periodically, made more comprehensive, and are able to be audited for completeness and correctness.

Measure 13.1.4
Establish and train a working group in each administration to regularly assess corruption risks created by the lack of transparency in procedures and costs, and to propose ways to mitigate those risks, with an annual progress report aggregated by the Office of the Prime Minister for all administrations. Submit the report to the Council of Ministers for adoption and publication.

POLICY PRIORITY 13.2
STRENGTHEN LEGAL AND JUDICIAL ANTI-CORRUPTION FRAMEWORKS

Proposed Measures

Measure 13.2.1
Amend Law No. 154 (2009) on anti-illicit enrichment to introduce a proper definition of crimes such as graft, grand theft by public officials, embezzlement, influence peddling, and other variants of political corruption, in line with the UN Convention against Corruption, and legislate adequate sanctions and judicial prosecution and enforcement mechanisms, while also eliminating barriers for triggering and conducting related investigations.
Combat

Agenda Priority 13

**Measure 13.2.2**
Amend the laws and regulations necessary to lift bank secrecy on Lebanese public officials, including the president, members of Parliament, ministers, judges, ranking public servants, and their relatives.

**Measure 13.2.3**
Finalize and adopt the law on conflict of interest, including the establishment of a national committee that reviews existing and proposed legislation and sets limits and regulations of potential conflicts of interests.

**Measure 13.2.4**
Make all requests for proposals and tendering processes related to projects and contracts transparent to the public; they should include the clauses of the final contract to be signed.

**Measure 13.2.5**
Speed up the implementation of Law 83 (2018) on whistleblower protection and adopt the needed regulations and complementary legislation to bring it into force, including the establishment of a national anti-corruption agency.

**Measure 13.2.6**
Amend laws and regulations that will help to combat the petty corruption of civil servants and municipal officials, and improve protection and verification of whistleblowers who expose instances of petty corruption.

**Measure 13.2.7**
Introduce transparency and accountability measures in all public-private partnership (PPP) contracts and arrangements, including the establishment of independent project-based audit committees to ensure compliance with those measures.

**Measure 13.2.8**
Establish and maintain a portal, supported by a mobile application, to publicly report in a timely manner on the receipt and expenditure of all international funding for projects that will be financed by contributions made through CEDRE.

**Measure 13.2.9**
Legislate links between serious corruption convictions and restrictions on convicted persons or judicial persons in their ability to hold positions of public office, participate in government procurement, or bid for governmental and PPP contracts and projects.
POLICY PRIORITY 13.3

IMPROVE INSTITUTIONAL AND SOCIETAL RESILIENCE AGAINST CORRUPTION

Main Challenges

- Improve institutional control mechanisms in the fight against corruption
- Enhance integrity of public and private sectors
- Create anti-corruption interface tools between the public and private sectors

Proposed Measures

**Measure 13.3.1**
Maintain existing anti-money laundering (AML) policy at Banque du Liban (BDL), Lebanon’s central bank, and introduce a random investigation mechanism of accounts and transactions.

**Measure 13.3.2**
Provide the Central Inspection Bureau and the Audit Bureau with IT systems to track complaints and files from beginning to end, and double the number of their inspectors and auditors respectively, while providing them with certifiable training and proper financial incentives.

**Measure 13.3.3**
Set up an independent national corporate governance program for private sector companies. This program should be aligned with international best practices and incentivize those corporations that adopt and adhere thereto.

**Measure 13.3.4**
Require corporate staff and civil servants to take part in regular awareness raising and training, prepared in coordination with civil society and international organizations.

**Measure 13.3.5**
Launch a program that educates adult citizens on methods to identify corruption, whistleblower responsibilities and protections, and channels for raising corruption concerns. Develop new channels through which citizens can alert judicial and administrative authorities to suspected incidents of corruption, and empower forums and mechanisms where anti-corruption organizations in civil society can advise citizens and take corruption-fighting actions in their support.

**Measure 13.3.6**
In educational institutions, from schools to tertiary education providers, strengthen curricula and programs that range from awareness building on the negative social impacts of corruption in civil education curricula to dedicated programs to train students to become experts in compliance with anti-corruption and governance mechanisms.

**Measure 13.3.7**
Implement and empower programs and forums to incentivize citizens who demonstrably practice behavior indicating civil integrity—challenging or counteracting incidents of petty corruption and societal corruption in their community, for instance—and institute programs that further encourage and reward exemplary behaviors.
COMBAT POLLUTION

Pollution in Lebanon is pervasive. The air and water are contaminated and noise levels are high as a result of heavy traffic, reckless driving, and unregulated noise levels for bars and clubs. For a resident of Keserwan, acid rain has become part of everyday life, thanks to the Zouk power plant; for a resident of greater Chekka, the likelihood of developing asthma or allergies is increasing.

Car emissions, in particular from red diesel-powered vehicles, is a primary source of pollution, despite a law prohibiting this diesel’s use. The law must be enforced and should be amended to remove the exemption for commercial vehicles or agriculture machinery. Lebanon also suffers from a waste management crisis. The country dumps its waste at facilities located along the seashore, polluting the water. This has health consequences for humans and marine life, and, among other effects, has had negative impacts on the country’s fishing industry. Open air dumps destroy Lebanon’s natural beauty, contaminate drinking water, and threaten the environment and wildlife, while the burning of garbage fills the air with contaminants that make life unbearable for residents living nearby. Even though Lebanon is not a country with highly polluting industrial activities or resource extraction as bases of the economy, the lack of environmental protections against illegal industrial practices, quarrying, construction, and real estate development activities has exacerbated the country’s trouble with maintaining minimal environmental integrity and quality of life for its population.

The degradation of environmental integrity, the violation of common sense and legal standards on environmental preservation and industrial pollution, the impunity of many individual and corporate violators, and the excessive overuse or profit-seeking impairment of scarce natural resources—such as intact forests and small ecosystems—have contributed to increasing direct and indirect costs to the Lebanese population. These costs can be seen in the proliferation of chronic medical conditions, such as cancers and respiratory diseases, and in negatively impacted economic activities, such as tourism.

Over the last 25 years, Lebanon’s environment has suffered rapid degradation—from the seashore to the mountain top—as well as the destruction of many symbols of Lebanese heritage. It is ironic when one considers that, in many ways, Lebanese citizens and companies, blinded by easy money, share the blame with the politicians and government entities that fail to punish those who violate environmental protection regulations. The number of traditional homes and buildings in major cities is dwindling. In fact, neighborhoods are being erased and replaced by vertical structures, and there are few public spaces in the capital. Lebanon’s environment is, put plainly, in a catastrophic state, and partial or ad hoc measures to change this trajectory will not suffice. The government must declare the state of the environment a national emergency, and devise, adopt, and enforce relevant legislation. Public and private stakeholders need to stand united in the fight against pollution.
Main Challenges

• Nudge, incentivize, and penalize citizens and households to encourage a shift from polluting to virtuous environmental behaviors in their daily lives
• Improve and enforce corporate and micro, small and medium-sized enterprises’ behaviors that comply with existing legislation and international standards

Proposed Measures

Measure 14.1.1
Adopt and enforce legislation regulating acceptable fuels for use in vehicles, and introduce incentives for adoption of less polluting vehicles.

Measure 14.1.2
Incentivize the purchase of eco-friendly cars and penalize usage of highly polluting or energy-inefficient vehicles, through means ranging from technical requirements and inspections to taxation tools.

Measure 14.1.3
Incentivize households to reduce consumption of fossil fuels and use low-energy devices and/or alternative power in heating, air conditioning, and personal mobility.

Measure 14.1.4
Take efforts to minimize household waste through cost-recovering waste collection fees and by introducing financial incentives and campaigns that encourage recycling. Encourage customers to use reusable eco-friendly bags in supermarkets. Impose a green tax (a small fee) on usage of plastic bags in supermarkets and other retail outlets, and place a tax on elaborate and wasteful packaging.

Measure 14.1.5
Adopt legal codes setting specific and adequate standards for limiting and regulating emissions and solid waste generation across all industries.

Measure 14.1.6
Outlaw quarries permanently, and revoke temporary licenses and special exemptions.

Measure 14.1.7
Apply and update real estate development rules and municipal building and zoning codes to better reflect environmental preservation and cultural heritage preservation. Enforce development regulations and real estate codes across Lebanon.

Measure 14.1.8
Require industrial producers to be located in licensed industrial zones that are equipped for the treatment of pollutants generated by the occupants.
Combat

Agenda Priority 14

Measure 14.1.9
Legislate and supervise the mandatory treatment of industrial waste, including solid waste, effluents, and aerial emissions. Prescribe new methods of proper collection and treatment, and penalize industrial violators with harsh and escalating punishments, ranging from fines to company closures and the imprisonment of noncompliant business owners and managers.

Measure 14.1.10
Legislate and implement workable waste treatment schemes, end the dumping of waste in the sea, and enforce compliance with Lebanon’s international obligations. Develop waste management solutions based on the reduce, reuse, and recycle principle, and develop sanitary landfills for non-recyclable waste.

Main Challenges

- Regulate admissible noise levels for noise emitters
- Enforce prohibition of fireworks outside of regulated usage

Proposed Measures

Measure 14.2.1
Introduce legislation regulating noise emissions from nightlife, private households, garden parties, and other events that typically have a high noise level.

Measure 14.2.2
Legislate permissible noise emission levels and, if applicable, times for operation of construction machinery and water pumps in residential zones.

Measure 14.2.3
Enforce noise limits on motor vehicles and make the modification of vehicles with noise-increasing devices illegal, if those devices generate noise above set decibel limits.

Measure 14.2.4
Enforce the prohibition of fireworks outside of preset periods and special exemptions for social events. Limit the sale of fireworks to adults and ban the risky use of fireworks by children. Penalize the unauthorized use of fireworks by households or event organizers and mandate municipal supervision and operation of fireworks in urban centers and in residential areas.

Measure 14.2.5
Set up municipal hotlines for complaints against all kinds of noise pollution.

Measure 14.2.6
Train (and raise awareness) of police officers on noise pollution regulations and issue fines to violators.
POLICY PRIORITY 14.3
STOP ENVIRONMENTAL DEGRADATION
AND PROMOTE GREEN LEBANON

Main Challenges

- Revitalize existing public spaces and create new ones
- Preserve green parks and forestry
- Encourage municipalities to introduce recycling programs

Proposed Measures

Measure 14.3.1
Preserve forested areas, outlaw any construction in areas ravaged by fires, and regulate wood collection and charcoal production.

Measure 14.3.2
Develop public parks, public spaces, and playgrounds, particularly in Beirut and residential suburban areas. Provide tax credit to municipalities that secure green areas.

Measure 14.3.3
Provide incentives (tax credit) to households and private sector entities that recycle, and to municipalities that introduce recycling plants or recycling programs.

Measure 14.3.4
Enforce laws protecting historic buildings and natural sites (e.g., certain neighborhoods in Beirut, or the natural rock formations in the Keserwan-Faitroun mountains), and introduce more barriers to the demolition of historic buildings and natural sites.
Lebanon has been active in negotiating a large number of framework trade agreements with Arab states, as well as Eastern European countries. However, trade agreements have not gone beyond simple tariff reductions, which have been demonstrated by economic literature to offer little to no gain. Moving to eliminate tariffs is not the main objective: Non-trade barriers remain the main obstacle facing the flow of merchandise, and these barriers have been erected by both Arab and EU trading blocs, which constitute over 60 percent of Lebanese export destinations. Moreover, the liberalization of agriculture and services, two sectors that are important to Lebanon and other developing countries, has been put on hold by developed countries, starting with the EU.

At the multilateral level, Lebanon has held observer status at the World Trade Organization (WTO) since 1999 but effectively launched the accession process in May 2001, as part of the Doha round of trade negotiations. The WTO can be seen as a mechanism to protect small economies and to resolve international trade disputes, in addition to ensuring that small economies are not marginalized in a globalized world. The accession must be finalized before the completion of the Doha round (which has been on ice for years, after overshooting its projected deadline of 2005) in order to avoid facing any new conditions and commitments that may ensue. Deeper integration offers dynamic long-term benefits and provides opportunities, notably to developing economies with the potential to grow, such as Lebanon. However, integration and harmonization under globalization require major reforms and efforts to upgrade and improve efficiencies that are inherently costly, especially to sheltered sectors or firms hidden behind protectionist measures.

The international trade liberalization process must thus be accompanied by internal measures to increase competitiveness. Because the Lebanese economy is overwhelmingly composed of micro, small, or medium-sized enterprises (MSMEs), any long-term plan to promote economic growth must target MSMEs and include mise à niveau programs to upgrade national competitiveness and enable local producers to penetrate foreign markets.

The factors behind the high cost of production and resulting lack of competitive edge in Lebanon are many. A rise in the price of petroleum or the lira-dollar peg implies more expensive imports (inputs); the high cost of services (telephones, power, transport, etc.) coupled with an uncompetitive internal market translates into economic inefficiencies and, therefore, above-market prices. All these factors, and others, increase the burden on producers. The remedy lies mainly in major structural reforms, such as introducing competition or improving access to capital for MSMEs. Competitiveness needs to be developed in ways that are compatible with the international obligations and trade agreements that have been signed by the Lebanese state and able to avoid pockets of inefficient economic production. In the long term, protectionism and other state measures to shelter domestic producers cause more harm than good.
POLICY PRIORITY 15.1
MAINTAIN FREE AND FAIR TRADE POLICY

Proposed Measures

Measure 15.1.1
Set up a new inter-ministerial and sectoral committee, under the leadership of the Ministry of Economy and Trade, to reassess bilateral trade agreements.

Measure 15.1.2
Adopt legislation relating to WTO accession. Negotiate new agreements with the GCC and emerging economies, such as Africa, China, and India, that go beyond merchandise trade to include services, investment promotion, and natural resources.

Measure 15.1.3
Establish an EU unit that is linked directly to the Office of the Prime Minister and includes representatives of all relevant ministries. Mandate this EU unit to strengthen cooperation, stressing issues such as market access, transfer of know-how, and regional infrastructure networking (e.g., electrical, maritime, etc.).

POLICY PRIORITY 15.2
UPGRADE COMPETITIVENESS OF NATIONAL ECONOMY

Proposed Measures

Measure 15.2.1
Set up a committee grouping public and private sector representatives to develop a two-year and five-year plan (mise-à-niveau programs) to improve competitiveness by identifying targets and performance indicators.

Measure 15.2.2
Reduce the cost of manufacturing production temporarily by, for example, providing solutions such as low power rates during off-peak hours for energy-intensive industries, or other innovations that are not distortive.

Measure 15.2.3
Set up an agency focused on export promotion and research in foreign markets, and in the immediate term train staff and diplomats across the globe to promote Lebanese businesses.

Measure 15.2.4
Build the capacities of specialized Lebanese institutions, namely the standards entity Lebanese Standards Institution and the Industrial Research Institute, to provide support services to all industries and incentivize development to export-oriented enterprises.
Develop

Agenda Priority 16

DEVELOP ENTREPRENEURSHIP SUPPORT

Since independence, Lebanon has adopted liberal economic policies whereby market forces dictate the behavior of economic agents. During the country’s 15-year civil war, state intervention in the economy increased, though often in a chaotic manner. Instead of adopting a regulatory framework that facilitated investment and encouraged growth, the state created obstacles for the private sector, imposing a heavy burden on the fiscal budget, and indirectly reducing economic efficiency and productivity. Over a quarter century after the war’s official conclusion, the outcome for Lebanon can be summarized as follows: Economic infrastructures have fallen behind, living standards have declined, poverty rates have increased, wealth distribution has become polarized and inequitable, the economy has become less diversified, markets have become dominated by oligopolies, the behavior of a large number of agents has been marred by corruption, and the government has failed to play its proper role as a visionary and a market regulator.

The Lebanese enterprise environment has been strung between the state’s underlying concept of entrepreneurship in a free-market economy and the corruption of the economy into fragmented silos with clientelistic structures under the control of competition-distorting oligopolies.

After years of slow growth, the economy picked up from 2004 and into 2010, with an average economic growth rate of 7 percent, only to suffer again from severe external shocks that curbed growth and accelerated the rate of young talent leaving the country—the brain drain.

Efforts to reinvigorate the Lebanese entrepreneurship potential—often referred to in reports on the successes of Lebanese migrants and, more recently, in assessments of the involvement of Lebanese individuals in tech entrepreneurship in the emerging digital age—were kickstarted in the 2010s with Circular 331 issued by Banque du Liban (BDL), Lebanon’s central bank, which aims to encourage and support the channeling of deposits from commercial banks into knowledge economy ventures by way of venture capital funds and intermediaries.

For the Lebanese economy to leverage the growing entrepreneurship successes in this ecosystem into wider gains—in the form of job creation, financial growth, capital markets opportunities, and the transition into a digital economy that can compete internationally—sustained efforts need to be made to develop knowledge economy capacities, the tech entrepreneurship ecosystem, its financial and legal support systems, and the encouragement of the entrepreneurial spirit of all Lebanese.
Main Challenges

- Further develop the knowledge economy ecosystem
- Improve access to financing for new enterprises
- Provide support to nascent exporters that incorporate digital technologies

POLICY PRIORITY 16.1
PROMOTE INNOVATION AND DIVERSIFICATION

Proposed Measures

**Measure 16.1.1**
Develop complementary projects to accompany BDL Circular 331 and complete the knowledge economy building blocks across the country: set up hackathons, pre- and post-accelerators, incubators, angel/seed and VC funds, and provide mentorship and coaching.

**Measure 16.1.2**
Support increased links among actors in the Lebanese entrepreneurial environment, particularly between actors and investment funds based in Beirut, and incubators, chambers of commerce, and growing enterprises nationwide, to enhance cluster development and promote investment in businesses inside and outside Beirut.

**Measure 16.1.3**
Develop schemes to subsidize pilot projects of new entrepreneurs and establish coordination mechanism between universities, the loan guarantee corporation Kafalat, and state entities (e.g., Euro-Lebanese Centre For Industrial Modernization and the Industrial Research Institute) to support innovative ideas.

**Measure 16.1.4**
Support incubated and accelerated projects and new firms’ move from ideation into phase two, enterprise building, by providing access to early-stage finance (seed funding, angel investors) to successful graduating companies.

**Measure 16.1.5**
Provide incentives to first-mover firms with future-oriented technology that export innovative and competitive tradable goods (meaning products or services not previously exported by the firm or from Lebanon).

POLICY PRIORITY 16.2
STRENGTHEN LEGAL AND INSTITUTIONAL FRAMEWORKS FOR ENTREPRENEURSHIP

Proposed Measures

**Measure 16.2.1**
Provide fiscal incentives to firms that allocate budgets for research and development (R&D).
Develop

Agenda Priority 16

Measure 16.2.2
Incentivize R&D budgets in universities and encourage the creation of technology transfer offices with grants to support spin-offs. Foster technology transfers between universities and the private sector.

Measure 16.2.3
Facilitate broader reforms in the judicial and legal systems (bankruptcy law, private equity and venture capital law, employee stock ownership plans, etc.), and continued education programs for lawyers on investor protections.

Measure 16.2.4
Enforce intellectual property protection through better laws and regulations.

POLICY PRIORITY 16.3
WIDEN ECONOMIC REACH OF MICRO, SMALL AND MEDIUM-SIZED ENTERPRISES (MSMES)

Proposed Measures

Measure 16.3.1
Develop various schemes in support of MSMEs, such as revolving and guaranteed funds that build on existing schemes such as the Kafalat and IM Capital equity guarantee scheme.

Measure 16.3.2
Create a one-stop-shop portal for MSMEs and startup entrepreneurs to access information and inquire about financial support and other incentives for startups.

Measure 16.3.3
Facilitate access to advisory services, such as strategic and financial planning for MSMEs. Legislate dedicated channels where MSMEs can bid for public procurement opportunities and public project tenders.

Measure 16.3.4
Integrate entrepreneurship and diaspora energy flows by activating diaspora channels for international market access, transfer of knowledge through mentorship or coaching, and linkage of resources between diaspora and local entrepreneurs on levels of investment and financing.

Measure 16.3.5
Continue capacity building with Lebanese customs authorities to increase transparency and efficiency of customs processes and reduce barriers that hinder growth of MSMEs.

Main Challenges

- Extend nascent support frameworks for MSMEs
- Link startups and MSMEs to diaspora investors
- Provide incentives for participants of microfinance institutions
Develop incentives for investors to participate in microfinance institutions, an approach that has proved successful around the world and is profitable to the investor and beneficial to the microenterprise.

Measure 16.3.7
Create a special legal form and structure for social enterprises. Introduce a means for the incorporation of not-for-profit and social enterprises.

Measure 16.3.8
Subsidize programs and nonprofit cooperatives aimed at consolidating small farmer communities and boosting their productivity.

Measure 16.3.9
Incentivize sector-specific funds in promising sectors, such as agro-food, film, and media, and social impact enterprises.

Measure 16.3.10
Incentivize business associations and business chambers to strengthen governance and types of business services, including information sharing to foster business development and growth in targeted sectors and sharing of market information.
DEVELOP LABOR

Labor, described by economic historian Karl Polanyi in 1944 as a “fictitious commodity,” is the lynchpin of any economy. As human capital is bound up in questions of justice, prosperity, dignity, and national identity, the issue of labor intersects with many of the agenda and policy priorities in this economic roadmap.

According to a recent international assessment of holistic wealth by the World Bank, human capital constitutes Lebanon’s biggest wealth-generator. However, estimates of the size and composition of the Lebanese labor market remain uncertain due to the lack of watertight data. Likewise, labor policy, as well as projections of future Lebanese labor realities, needs, and opportunities—in the context of rapidly evolving global digitization, or the digital transformation of economies—leaves much to be desired. This makes it crucial to develop our human capital and preparedness for the labor uncertainties of coming decades.

To understand already predictable risks, shore up responsive capabilities to unpredictable elements, and enhance the supply of work, Lebanon needs to develop its knowledge base on labor issues as 2020 approaches. It may be best served in this by measuring the labor force participation rate, and the gap between actual participation and potential participation. The last official measurement of Lebanon’s unemployment rate, in 2007, settled on 9.7 percent. However, the International Labour Organization (ILO) modelled unemployment at just under 7 percent in 2018, and unemployment for Lebanese youth (which the ILO defines as those between 15 and 24), is estimated at almost 18 percent.

Total labor participation by Lebanese nationals older than 15, the portion that is defined as being economically active, stood at 47 percent, with the number of people in the labor force just above 2.2 million in 2018.

A labor issue with additional data uncertainty and many troubling implications is the presence of exploitation and the very poor integration of temporary foreign labor (which is linked to voluntary and involuntary migrations). Among the nearly 1 million UNHCR-registered Syrian refugees, according to the Lebanon Crisis Response Plan 2017 (LCRP), an estimated 36 percent were unemployed. Meanwhile, the count of non-nationals employed as “domestic workers” (providing services to Lebanese households) was estimated in a 2018 study by Human Rights Watch (HRW) at 250,000 persons. Although some limited coverage of the social insurance needs of domestic workers is mandated under Lebanese law, domestic workers do not have access to labor law protections and many social safety nets.

Determinants of current and future labor markets and processes—such as labor unionization, collective bargaining, regulation of specific labor market admissions, evolution of social insurance in reflection of social and human conditions (such as increasing longevity)—are in need of new assessment. This assessment must be completed before it is possible to develop a new national labor policy. Such a policy, however, must be devised and function as the cornerstone of the sustainable future of Lebanese labor, as much of the existing regulatory framework governing Lebanon’s labor-related social insurance system is radically outdated. The framework for the National Social Security Fund (NSSF) and other retirement benefits date to the 1960s and are inadequate for managing today’s radically different and rapidly changing role of human capital.
POLICY PRIORITY 17.1

ESTABLISH IMMEDIATE MEASURES FOR LABOR INFUX

Main Challenges

- Take measures to quantify the labor pool
- Provide incentives for local job creation in the context of planned public-private partnerships and infrastructure projects with international financing and corporate involvement
- Design and extend incentives for job creation by Lebanese entrepreneurs returning from abroad
- Increase diversity and productivity of expatriate and diaspora entrepreneurship and job creation ventures, and ease integration of qualified foreign labor into Lebanese enterprises

Proposed Measures

Measure 17.1.1
Restructure and strengthen the mandate of the National Employment Office (NEO) to collect information from Lebanese residents and Lebanese returning from abroad, as well as Syrian and Palestinian refugees, and create a file for each applicant.

Measure 17.1.2
Qualify and quantify the labor pool as well as its social development levels, and match it with available demand for labor and with the planned public works projects under CEDRE.

Measure 17.1.3
Develop a participatory framework involving ministries for approved employment programs. Expand the diversity of the qualified labor pool and enhance the development of local business establishments by revising the regulations for foreign labor participation in Lebanese enterprises, and provide preferential treatment to entrepreneurs and qualified returnees with Lebanese roots by approving foreign licenses, degrees, and other specialist qualifications.

POLICY PRIORITY 17.2

STRENGTHEN WORKERS' RIGHTS

Main Challenges

- Define the role of labor unions
- Modernize labor laws
- Improve work-related social insurance reach and coverage

Proposed Measures

Measure 17.2.1
Draft new bylaws for unions and implement legislation with the aim of promoting a more constructive and independent role for unions.

Measure 17.2.2
Develop and fund training and development programs to provide new skills to the unemployed, and all whose jobs have been made redundant by technological developments.

Measure 17.2.3
Amend the Lebanese labor law to include all foreign workers, unifying the rules for local and foreign workers, thereby integrating current special rules applied to migrant workers into the labor law. This will include access to registration and ability to receive compensation from the NSSF.

Measure 17.2.4
Review and, if necessary, revise financial inputs to and benefits packages of work-related social insurance systems.
Develop

Agenda Priority 18

DEVELOP DIASPORA OUTREACH AND INTERACTION

Each year Lebanon consistently produces more university graduates and workers than its economy can absorb. Together with cultural and political factors, the lack of opportunities at home has pushed Lebanese to migrate abroad for over a century. These outflows and migrations to countries in Europe, Western Asia, the Americas, Africa, and Oceania have translated into a huge diaspora—Lebanon has one of the world's highest ratios of expatriates to residents. Since the end of the Lebanese civil war in 1990, the attraction and integration of the diaspora's human capital financial energies was a—sometimes informal and sometimes more formal—political paradigm aimed at boosting economic development.

One element the state must work to ameliorate is the current inability of the public and private sectors to provide adequate job and career opportunities to highly qualified graduates of tertiary academic institutions. This brain drain has been a concern over the past 25 years and remains one, as the country is unlikely to generate enough career options for highly qualified graduates in the foreseeable future. However, while the state may be unable to completely stop emigration, it ought to develop the means—through designing policies and engineering institutional capacities—to make inroads toward helping more Lebanese find jobs in their homeland. While such efforts would likely be futile as standalone political or fiscal initiatives, they could generate multiple benefits if done in conjunction with improvements in Lebanese competitiveness and strengthening heritage preservation and increasing national identity appreciation (see Agenda Priorities 15 and 19 in this economic plan).

Furthermore, one must not overlook the complexities that come with trying to engage a large diaspora that collectively holds considerable (indeed, potentially vast but so far unquantified) amounts of financial wealth, human capital, and entrepreneurial energies. The economic and social impacts, or embedded upside and downside risks, of the imbalance between the national and expatriate population groups seem to be not sufficiently understood. Downsides of the strength of the diaspora, according to research by economists at the World Bank, are suspected to include factors such as a “remittance curse,” whereby (data suggests) remittance inflows are not necessarily translated into investments, as they are predominantly channeled into consumption. Another repercussion of the Lebanese economy’s dependence on remittances potentially relates to the distortive impact on the relation of tradable to non-tradable goods and services—such distortion emerged in 20th century research as the “Dutch disease.”

Policy-makers and influencers must therefore focus on developing means to reduce the brain drain as well as policies to improve the utilization of remittances and generally redirect capital inflows from fueling unproductive consumption and asset inflation toward providing development capital that creates high-skilled jobs. It has been established in the past 25 years that the financial inflows from and links to the diaspora have been instrumental to Lebanon’s ability to absorb financial shocks. Development needs in the efforts to reach out to, and maintain relations with, the diaspora extend far beyond the issues of financial inflows, remittances, and the construction of villas in the ancestral villages of diaspora members. Opportunities in diaspora relations that are worthy of exploration and development...
include accessing the human capital pool as well as attracting technology transfers. Government policies are needed to enhance connections between the diaspora and the homeland and to capture them in the formal economy. Relying on emotional appeals of love for the homeland and long-distance patriotism have not been enough to convince Lebanese diaspora members of the opportunities they could enjoy in Lebanon. Diaspora outreach and relations therefore represent an underutilized opening to widen the economic reach of Lebanon in ways that could augment the Lebanese economic sphere beyond its geographical confines and balance the country’s internal and external political risks.

POLICY PRIORITY 18.1
CAPITALIZE ON DIASPORA RESOURCES

Main Challenges

- Develop a registration protocol and conduct a census
- Incentivize and attract diaspora tourism
- Optimize existing outreach channels and increase the strength of diaspora network
- Incentivize the use of remittances to fund sustainable investment projects
- Promote opportunities for diaspora investors to develop export-oriented ventures in Lebanon

Proposed Measures

Measure 18.1.1
Clearly define “resident” and “expatriate” and create a census of expatriates.

Measure 18.1.2
Mandate the tourism and economy ministries to develop and implement a strategy to attract diaspora tourism and investment in Lebanon. This should include incentives to visit Lebanon, as well as incentives to invest.

Measure 18.1.3
Involves the tourism and economy ministries to develop and implement a strategy to attract diaspora tourism and investment in Lebanon. This should include incentives to visit Lebanon, as well as incentives to invest.

Measure 18.1.4
Incentivize the channeling of remittances to investment projects in Lebanon by providing tax incentives and exemptions for new and sustainable ventures, such as eco-resorts, and heritage and rural tourism projects, as well as all commercial establishments with high invested remittance amounts that are compliant with national priorities set by the Lebanese government.

Measure 18.1.5
Incentivize the channeling of remittances to investment projects in Lebanon by providing tax incentives and exemptions for new and sustainable ventures, such as eco-resorts, and heritage and rural tourism projects, as well as all commercial establishments with high invested remittance amounts that are compliant with national priorities set by the Lebanese government.
Develop

Agenda Priority 18

**Measure 18.1.6**
Encourage, specifically, diaspora investments into Lebanese startups, through companies such as Berytech and Beirut Digital District (BDD).

**Measure 18.1.7**
Create a database—including a list of supported target markets and a list of legal requirements, such as fees and certifications—for all tradable services and goods that can be exported from Lebanon to regional and international markets.

**Measure 18.1.8**
Standardize Lebanese products and certification norms in order for goods to readily comply with standards in target countries.

**POLICY PRIORITY 18.2**
**INSTITUTIONALIZE RELATIONS WITH THE DIASPORA**

Proposed Measures

**Measure 18.2.1**
Build e-government access to enable the diaspora to easily apply for official documents.

**Measure 18.2.2**
Remove or reduce red tape at Lebanese ministries with specific attention to the needs of diaspora investors. Develop and simplify procedures that diaspora investors can follow when embarking on an investment process in Lebanon. Empower embassies to provide free and competent legal guidance to potential diaspora investors.

**Measure 18.2.3**
Enhance ministerial support for Lebanese cultural clubs abroad and promote alliances and partnerships with foreign universities and think tanks.

Main Challenges

- **Empower diaspora access to e-government services in Lebanon**
- **Increase support for Lebanese clubs and boost capacities**
- **Develop outreach campaigns**

Main Challenges

- Empower diaspora access to e-government services in Lebanon
- Increase support for Lebanese clubs and boost capacities
- Develop outreach campaigns
Measure 18.2.5
Incentivize syndicates and professional associations in Lebanon to reach out to diaspora communities when looking for partners, honorary members, or investors. Promote large investment projects such as job-creating real estate ventures and sustainable or heritage-enhancing real estate projects, through targeted discounts for diaspora members.

Measure 18.2.6
Better communicate loans from Banque du Liban (BDL), Lebanon’s central bank, that are tailored for expatriates (e.g., BDL Housing Loan under Circular 475, and the BDL loan for expatriate investors that is capped at $15 million).

Measure 18.2.7
Expand collaboration between Lebanese ministries and the Lebanese Diaspora Energy (LDE) organization to design and organize LDE regional conferences around the world.

PRESERVATION OF HERITAGE, CULTURE,
AND IDENTITY

Lebanon is globally respected for its cultural history as the homeland of a people who were among humankind’s innovators in trade, use of money, and expression of identity through architecture and writing. Cities in the Eastern Mediterranean region may disagree on which can claim to be the world’s oldest continually inhabited settlement, but it cannot be denied that urban settlements in this region have histories and identities that are more than deserving of protection and preservation for future study and enjoyment. Until today, however, the Lebanese state has not shown a universal understanding and political will to improve and enforce existing laws on the protection of antique treasures. Nor has the country shown any signs of developing and pursuing a national strategy to preserve our natural and built heritage. In matters of heritage, Lebanon still relies on outdated legislation—Law 166 (1933) issued under the French Mandate. The country’s architectural identity is being lost as chaotic real estate developments are pursued for profit motives but in total absence of any vision to preserve heritage clusters and integrate them into a Master Plan for future development. Our natural heritage, including our coast and historical landscapes, are being disfigured.

POLICY PRIORITY 19.1
LEGAL REFORM FOR HERITAGE PRESERVATION

Proposed Measures

Measure 19.1.1

Measure 19.1.2
Pressure Parliament to revise and pass the law on the preservation of heritage sites and buildings that was approved by the Council of Ministers in October 2017.

Measure 19.1.3
Pressure the Directorate General of Urban Planning to work on a comprehensive updated Master Plan that preserves what is left of our cultural natural and built heritage.

Main Challenges

• Update the legal code
• Create a central plan for preservation
